

## Happy New Year!

Most people's resolutions involve investment in oneself - better posture, exercise, putting screens away an hour before bed... We hear you. Bettering yourself betters the world around you. But what about direct investment in your community? A huge step is remaining aware of local issues, and learning how to better our environment, in our valley and beyond!

To kick-start 2020, Methow Beaver Project and Okanogan Highlands Alliance will present ***Chew on This...*** an evening of "Edu-tainment", complete with Washington-grown performers, and presentations on **how people and beavers are re-building watershed resiliency...naturally!**  
(See flyer below for more information)

What else is new? MBP continues through the winter to study the relationship between endangered salmonids and beaver complexes, and is gearing up for an exciting 2020 season of BDA installation, beaver conflict management, and translocation!
