

You did it! Thanks to generous donations from **YOU**, our fabulous community, we raised over \$7,000 to support ongoing watershed restoration! Every dollar helps us devote another day towards beaver conservation, habitat restoration, and coexistence tools for in-place management of beavers!

Moving Forward...

- MBP is diversifying its services to the Methow Valley community, offering coexistence measures in support of living with beaver where they are. These include tree protection, flow control, and fish passage devices.
- Planning is underway for restoration projects in 2020 and beyond.
- Beaver and salmon? MBP explores the modern relationship between co-evolved species who share habitat often limited by human infrastructure. Our research will help shed light on the controversial question of whether beavers create critical habitat for these intrepid anadromous and endangered fish, or create more barriers, or perhaps both. It's ecology - complex and absolutely fascinating!

Future Volunteer Opportunities

Interested in getting involved? We always welcome volunteers for feeding beaver at the hatchery, getting hands dirty at work parties, and increasing our educational outreach! Eyes on the ground are appreciated as well - seen beaver or their signature activity? Let us know!
