Funday Monday: it's Give Methow Season!

It's Funday Monday again! Every Monday in October during Give Methow, any donation made on a Monday will enter you into a drawing to win the chance to donate even more to the cause of your choice!

This year at MBP we are raising money to support 2024 Summer Interns who will help us reestablish native beavers across our watersheds! This week we are featuring one of our 2023 Summer Interns, Livvie.

Livvie

Livvie is majoring in Environmental Politics at Whitman College. When we asked her to share her motivation for pursuing this internship and her favorite memory from the summer, here is what this stellar young student had to say:

" This internship has inspired a passion for ecology and restoration that I really hope will find its way into my career path at some point post-graduation. It has also turned me into the biggest beaver nerd – I feel like I am constantly spewing beaver fun facts and love any opportunity to share about the benefits of beaver-based restoration. My favorite two memories from the summer are getting to meet Honey the beaver up close during her intake process and our awesome all-women BDA build day! "

Thank you again for showing your support for the Methow Beaver Project and nature-based solutions to restoring watershed function, protecting biodiversity, and rebuilding climate resilience! We could not do this without you!
